

FERNANDO GABRIEL QUIROGA

Programming Student | Software Developer (.NET / C# / C++)

General Pacheco, Buenos Aires, Argentina | quirogabyuv@gmail.com | LinkedIn: [linkedin.com/in/fernando-gabriel-quiroga-medina-22a8b3373](https://www.linkedin.com/in/fernando-gabriel-quiroga-medina-22a8b3373) | Phone Number: +5491165639854

Programming student at Universidad Tecnológica Nacional (UTN FRGP) focused on robust software development, object-oriented design, and data persistence. Academic work spans C++, C#/.NET, WinForms, SQL Server, and standard web technologies, from low-level binary file persistence to layered desktop applications. Team-based development with Git/GitHub, with emphasis on maintainable and efficient code.

EDUCATION

Universidad Tecnológica Nacional - Facultad Regional General Pacheco (UTN FRGP)

General Pacheco, Buenos Aires

University Technician in Programming - In Progress | 2024-Present

Technical focus: C++, C#/.NET, object-oriented programming, relational database modeling, data persistence, and collaborative software development

ACADEMIC SOFTWARE DEVELOPMENT

UTN FRGP - Collaborative Academic Projects

General Pacheco, Buenos Aires

Software Developer / Collaborator | 2024-Present

- Develop collaborative console and desktop applications in C++ and C#/.NET, applying object-oriented design, modular architecture, and structured problem solving.
- Implement data persistence through binary files and relational databases, including SQL Server CRUD operations and structured queries.
- Use Git and GitHub for version control and team collaboration, with emphasis on readable, maintainable, and efficient code.

SELECTED PROJECTS

Sistema de Gestión Integral para Club

C++ | Console App

UTN FRGP - Group Academic Project

- Modular management system for members, activities, registrations, and memberships using object-oriented programming and binary-file persistence with <cstdio>.
- Contributed to business logic, data-structure design, and low-level persistence workflows.

GitHub: github.com/SaikoVn/ProyectoUTNGestorClub

Enredados - Turn-Based Dice Game

C++ | Console App

UTN FRGP - Integrative Group Assignment

- Multiplayer round-based dice game featuring 6- and 12-sided dice, combined score calculations, turn management, and rigorous input validation.
- Contributed to scoring logic, flow control, and functional testing.

GitHub: github.com/Soymigueprogramador/tpi-grupo2

Commercial Catalog & Inventory System

C# (.NET) | WinForms | SQL Server

UTN FRGP - Software Development Project

- Layered desktop application for centralized inventory-item management with full CRUD operations and direct integration with a local SQL Server relational database.
- Led WinForms interface design, data mapping, and persistence logic.

GitHub: <https://github.com/SaikoVn/tp-winform-equipo-j>

TECHNICAL SKILLS

Languages: C++, C#, Python, JavaScript, HTML5, CSS3

Frameworks & Technologies: .NET Framework, Windows Forms, Web Standards

Databases: Microsoft SQL Server - relational modeling, DDL/DML, structured queries

Tools & Methods: Git, GitHub, Object-Oriented Programming (OOP), binary-file persistence

Human Languages: Spanish (Native) | English (B1 - technical reading/documentation)
